

CLOUD.GOV OVERVIEW

Expedite your agency's path to a secure and compliant cloud

cloud.gov provides an application environment that enables rapid deployment and ATO assessment for modern web applications.

Email us with questions or to get set up with one of our paid packages.

COMPLIANT FROM THE START

Avoid common infrastructure and compliance work. cloud.gov was built by a government team for government teams and designed around the standards and regulations agencies need to meet. Our commitment to your security is backed up by a FedRAMP Joint Authorization Board P-ATO at the Moderate level (and DISA Level 2 Provisional Authorization). These authorizations set up an expedited path for your own agency's ATO process.

Visit <https://cloud.gov/compliance/> for more details.

GET STARTED WITH CLOUD.GOV

- Sandbox spaces are free if you have a federal email address. Try cloud.gov without any paperwork or hassle. Sign up at <https://account.fr.cloud.gov/signup>
- Upgrade to a prototyping package and develop new apps in a production-ready environment. \$15k gets you full access for unlimited users for a whole year.
- If you have an app that's ready for public use, our production packages start at \$21k up to \$90k for FISMA-moderate per year.

CLOUD.GOV IS GREAT FOR:

Easily building new, cloud-native applications

Migrating existing applications to the cloud, making them easily scalable and reducing maintenance costs

Advancing your agency's use of the cloud by providing teams a place to prototype in a FedRAMP-authorized environment
